OFFICE OF THE DIRECTOR OF ANIMAL HUSBANDRY SERVICES IN MYSORE, BANGALORE.

Notification dated 19th March 1951. 297

(HEALTH OF LIVE-STOCK DURING FEBRUARY 1951).

In their order of severity, outbreaks of Rinderpest, Black-quarter, Foot and Mouth, Anthrax, Ranrkhet, Hæmoirahagic-septicæmia, Sheep-pox, Contagious goat Pleuro-pneumonia and Rabies were encountered in the State during February 1951. Altogether 183 villages were reported to have been affected by one or the other of the several contagious and infectious diseases, as against 161 villages during the previous month. The number of outbreaks was highest in Kolar, Bangalore and Tumkur Districts, while Hassan, Shimoga and Chikmagalur Districts were least affected. These diseases accounted for 2,241 attacks, of which 1,281 succumbed as against 1,053 attacks and 712 deaths during the previous month. The departmental staff conducted 33,438 preventive inoculations and vaccinations against all the above diseases except Foot and Mouth disease. In the absence of a reliable method of vaccinatory intervention, other prophylactic measures were adopted against Foot and Mouth disease.

Four outbreaks of Rinderpest of which two were among sheep and goats were registered in Bangalore South, Davangere and Chitaldrug Taluks accounting for 24 attack among cattle and 1,300 attacks among sheep and goats, o which 14 cattle and 840 sheep and goats succumbed. Prompt measures of control were undertaken by the Department to check its spread and 1,438 cattle in the infected villages and 14,015 cattle and 82 sheep and goats in the 36 neighbouring villages extending over a radius of three miles were protected against this disease. The disease appeared to be well under control at the end of the month under report.

Prevalence of an obscure disease characterised by Gastro-entritis among cattle and buffaloes in Hassan and Chikmagalur Districts was reported during the month. The staff of the Department have protected 371 animals during the month in these districts against the disease.

Diseases caused by internal parasites were reported from 100 villages resulting in 67 deaths as against 118 villages accounting for 49 deaths during the previous month. The special staff attached to the parasitic disease control units of the Department dosed 3,308 animals as against 8,344 animals during the previous month.

The rest of the live-stock remained free from diseases during the month and, fodder and water were generally available throughout the State.

BANGALORE,
Dated 9th April 1951.

N. V. SIDDALINGAPPA,
For *Director.*

OFFICE OF THE DIRECTOR OF ANIMAL HUSBANDRY SERVICES IN MYSORE, BANGALORE.

Notification dated 13th April 1951.

(HEALTH OF LIVE-STOCK DURING MARCH 1951).

In their order of severity, outbreaks of Rinderpest, Black-quarter, Anthrax, Hæmorrhagic-septicæmia, Foot and Mouth, Sheep-pox, Ranikhet, Contagious-goat Pleuro-pneumonia and Rabies were encountered in the State during March 1951. Altogether 177 villages were reported to have been affected by one or the other of the several contagious and infectious diseases, as against 183 villages during the previous month. The number of outbreaks was highest in Mysore, Tumkur and Kolar Districts, while Shimoga Mandya and Chikmagalur Districts were least affected. These diseases accounted for 920 attacks, of which, 656 succumbed as against 2,241 attacks and 1,281 deaths during the previous month. The departmental staff conducted 37,008 preventive inoculations and vaccinations against all the above diseases except Foot and Mouth disease. In the absence of a reliable method of vaccinatory intervention, other prophylactic measures were adopted against Foot and Mouth disease.

Sixteen outbreaks of Rinderpest of which four were among sheep and goats were registered in Bangalore South, Magadi, Pavagada, Krishnarajanagar, Chitaldrug, Molakalmuru, Chennagiri, Honnali and Tirthahalli Taluks accounting for 78 attacks among cattle and 286 attacks among sheep and goats, of which 31 cattle and 188 sheep and goats succumbed. The increase in the incidence of Rinderpest is mainly due to the congregation of cattle in the Rampur cattle fair in Honnali Taluk and Sugganahalli cattle fair in Magadi Taluk, in both of which the disease broke out and disseminated the infection to other villages. Nevertheless, prompt measures of control were undertaken by the Department to check its spread and 5,524 cattle and 1,240 sheep and goats in the infected villages and 17,514 cattle and 594 sheep and goats in the 72 neighbouring villages were protected against this disease. The disease appeared to be well under control at the end of the month under report.

Prevalence of an obscure disease characterised by Gastro-entritis among cattle and buffaloes in Hassan and Chikmagalur Districts was reported during the month. The staff of the Department have protected 1,104 animals during the month in these districts against the disease.

Diseases caused by internal parasites were reported from 86 villages resulting in 46 deaths as against 100 villages accounting for 67 deaths during the previous month. The special staff attached to the parasitic disease control units of the Department dosed 6,238 animals as against 3,308 animals during the previous month.

The rest of the live-stock remained free from diseases during the month and, fodder and water were generally available throughout the State.
